

“OWLS OF ILLINOIS”

Ever wonder what that sound is outside your window at night?? Chances are it's probably an owl.....but what kind of owl?? A program for the young & young at heart will help you to identify which species is making that hoot!!!!

On Sunday, October 20th, 2:00-4:00pm, we will explore which owls call Illinois their home and which owls are winter migratory visitors. After a Power Point presentation, all participants can observe the many owl posters on display, dissect an owl pellet and kids can make a take-home craft. On display will be a Great Horned Owl skull and talon. Snack provided.
